

Challenge Statements – IKP Eden

1. Faster way to manage rising intracranial pressure after head injury
2. Diabetes diagnosis and management
3. Efficiency, Consistency & Repeatability of healthcare service delivery
4. Affordable and accessible primary care
5. Poor NPV in primary care examination procedures. Gold standards need to be re-assessed with intrinsic standards and calibrations in those settings.
6. Capacity building, especially on-the-job healthcare learning, as well as high turnover rates of human resources - especially community health workers.
7. Challenges in convergence with other sectors such as water and sanitation
8. High burden of data collection & low levels of data use for quality improvement/management decision making
9. Insufficient spending of NUHM funds
10. Lack of engagement in health from municipal corporations/local government; a strong private sector means high OOP spending and uneven quality of care.
11. Low cost early stage diagnostics for Cancer
